

Student and Mentor Registration

If you are interested in meeting with a student or professional please fill out the following information about yourself and return by **December 1, 2004**. This information will assist with the pairing of students and mentors and to get job information to the students. By registering, mentors agree to meet with their paired student and treat them to at least one meal anytime during the conference. The Midwest Fish and Wildlife conference Committee has agreed to reimburse mentors up to \$10. Students and mentors are expected to meet on Monday morning and can make additional meeting and meal arrangements at that time. All students and registered mentors also are invited to a social on Monday evening that will include beverages and snacks.
